RULES AND REGULATIONS

MONITORING OF CUSTOMER USAGE

At least once annually the Company will monitor the usage of each Customer according to the following procedure:

- (1) The Customer's annual usage for the most recent 12-month period will be compared with the annual usage for the 12 months immediately preceding that period.
- (2) If the annual usage for the two periods are substantially the same or if any difference is known to be attributed to unique circumstances, such as unusual weather conditions, common to all Customers, no further review will be done.
- (3) If the annual usages differ by twenty (20) percent or more and cannot be attributed to a readily identified common cause, the Company will compare the Customer's monthly usage records for the 12-month period with the monthly usage for the same months of the preceding year.
- (4) If the cause for the usage deviation cannot be determined from analysis of the Customer's meter reading and billing records, the Company will contact the Customer by telephone or in writing to determine whether there have been changes such as different number of household members or work staff, additional or different appliances, changes in business volume, or known leaks in the Customer's service line.
- (5) Where the deviation is not otherwise explained, the Company will test the Customer's meter to determine whether it shows an average error greater than 2 percent fast or slow.
- (6) The Company will notify the Customers of the investigation, its findings, and any refunds or backbilling in accordance with 807 KAR 5:006, Section 10(4) and (5).

In addition to the annual monitoring, the Company will immediately investigate usage deviations brought to its attention as a result of its on-going meter reading or billing process or customer inquiry.
